

# COMPANY PRESENTATION

---

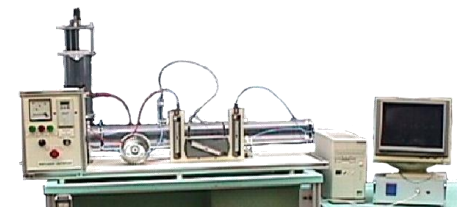

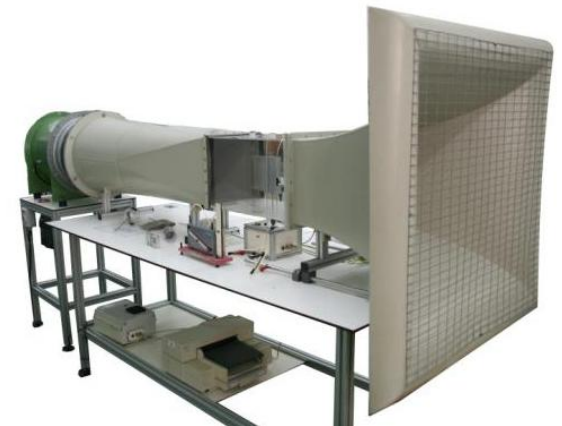

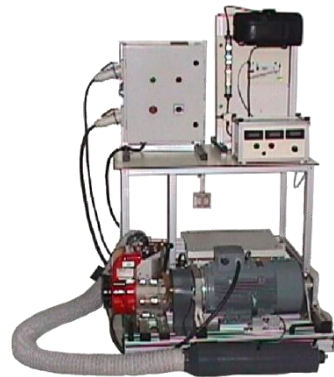

## WHAT WE DO?

## TEACHING EQUIPMENT

The **core business** of DIKOIN is the design and production of didactic equipment for engineering in areas such as:

- Fluid dynamics
- Thermal engineering
- Renewable energy
- Aerodynamics
- Water Treatment
- Heat transfer
- and many other...

## TEACHING EQUIPMENT

We are specialists in developing personalized equipment, to achieve the requirements of each laboratory, with the latest technologies in parameter measures and data acquiring.

We have a wide range of more than 100 models available.

## RESEARCH EQUIPMENT

DIKOIN collaborates with university research departments, as design consultant and builder of pilot plants.

Our work is based in giving a full support in design, prototyping and building almost any kind of special laboratory equipment.

# COMPANY

## DISTRIBUTION

DIKOIN commercializes a wide range of products for installations, often giving **technical support** on how to use and maintain the equipment.

THANK YOU FOR YOUR ATTENTION!
